Eight Tools for Watershed Protection in Developing Areas

**Wednesday,
June 22
GEF2 in G09
12:00-2:00**

GEF2 is the only place you can participate in this Internet seminar as registration for the session is now full!

This EPA sponsored webcast will highlight effective tools communities can apply to minimize impacts of land development on their streams, lakes and estuaries. Topics include:

- ★ Impervious cover (IC) as a key index of watershed development
- ★ Relationship between IC and more than twenty indicators on aquatic quality
- ★ Impervious Cover Model (ICM)
- ★ 8 tools for watershed protection

Upcoming brownbag sessions

**June 29
Invasive Species Management Tools**
